EDUCATION / CERTIFICATION

Virginia Tech Blacksburg, VA Bachelor *of Science in Computer Science* *Graduation Date: May 2026*

AWS Certified Developer – Associate, *Amazon Web Services (AWS)* *Achieved: February 2025*

WORK EXPERIENCE

Parsons Corporation **Herndon, VA**

Software Developer *May 2025 – Present*

- Designed and delivered a production-ready feature within an 8-person Agile team, owning cross-layer architecture and backend API integration to ensure scalable service communication.
- Modernized over 60% of a legacy frontend by introducing reusable modular components, improving maintainability and accelerating future feature development.
- Implemented real-time socket-based communication and refactored backend models into DTOs, improving data consistency and system reliability across service boundaries.
- Led system and integration testing efforts, identifying and resolving defects prior to release to ensure operational stability.

AI & Cloud Projects

Kustu — AI-Powered Distributed Stock Analytics Platform

Founder & Software Engineer *June 2025 – Present*

- Architected and deployed an AI-powered cloud-native stock analytics platform supporting analysis across thousands of publicly traded companies using AWS Lambda, API Gateway, PostgreSQL, DynamoDB, Cognito, and React.
- Built AI-powered financial summaries by integrating the OpenAI API into a serverless backend to generate structured company analysis from financial data.
- Designed asynchronous financial data pipelines that ingest SEC filings and market data to compute 30+ valuation metrics and persist structured analytics for investment research.
- Reduced AI-generated summary latency by 90% (10s → 1s) through server-side caching, decreasing redundant inference requests and improving application responsiveness.
- Owned the complete software lifecycle including architecture, backend development, frontend development, cloud infrastructure, CI/CD, monitoring, and production deployment.

Ascend at Virginia Tech **Blacksburg, VA**

Web Developer and Manager *Nov 2024 – May 2026*

- Migrated infrastructure from EC2 to AWS serverless architecture (Lambda, API Gateway, DynamoDB), improving uptime by 60% and reducing latency by 30%.
- Designed RESTful APIs and implemented event-driven request handling using Lambda functions to ensure scalable, cost-efficient backend services.
- Mentored junior developers on Git workfloMGws, code reviews, and CI/CD best practices to ensure maintainable, production-quality releases.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, TypeScript, C#, SQL
AI:	OpenAI API, Prompt Engineering
Backend & Cloud:	AWS Lambda, API Gateway, Cognito, Distributed Systems, Docker, EC2, Microservices, REST APIs, Serverless Architecture
Databases:	PostgreSQL, DynamoDB, MySQL, MongoDB
Frameworks:	React, Node.js, Express.js, Material UI
Core CS:	Data Structures & Algorithms, Object-Oriented Programming, System Design
Developer Tools:	Git, GitHub, CI/CD

LEADERSHIP

Ascend at Virginia Tech | *Co-Founder* | *Treasurer* | *Project Manager* *Nov 2024 – May 2026*

Filipino American Student Association | *Web Developer* | *Project Manager* *May 2023 – May 2026*
